

FINDING YOUR WAY AROUND ASTHMA

Questions to ask your doctor:

- What is the name and dosage of my medicine, and how long should I take it? What should I do if I forget to take it?
- How will I be able to tell that the medicine is working, and what should I do if it doesn't seem to be working?
- Are there possible side effects, and what should I do about them?
- What warning signs should I look for?
- What should I do in an emergency?
 - What information should I have ready?
 - Whom should I call for help?
